Hi Heather:

In one of our December discussions, you posed the question of whether the WET holding times apply to both initial and renewal samples. We will be prepared to discuss that issue on Monday and Jamey will be able to attend at the beginning of the Monday call to discuss any other WET questions you might have pending.

If you have other WET questions and your time permits, please forward them to the three of us if you can before the meeting which might give us time to review and be prepared to respond.

Thanks.

Rick
